

Web / Mobile App Developer

Role Overview

We are looking for a qualified mobile / web app developer to join our Engineering team. You will be working with our engineers to develop and maintain high quality mobile-friendly applications. If you're passionate about web and/or mobile platforms and translating code into user-friendly apps, we would like to meet you. As a mobile developer, you'll collaborate with internal teams to develop functional mobile applications, while working in a fast-paced environment.

Responsibilities

- Support the entire application lifecycle (concept, design, test, release and support)
- Produce fully functional web and/or mobile applications writing clean code
- Gather specific requirements and suggest solutions
- Write unit and UI tests to identify malfunctions
- Troubleshoot and debug to optimize performance
- Design interfaces to improve user experience
- Liaise with Product development team to plan new features
- Ensure applications meet quality standards
- Research and suggest new mobile products, applications and protocols
- Stay up-to-date with new technology trends

Requirements

- Proven work experience as a web/mobile app developer
- Demonstrable portfolio of released applications on the App store or the Android market
- In-depth knowledge of at least one programming language like Swift, Dart and Java
- Experience with third-party libraries and APIs
- Familiarity with OOP design principles
- Excellent analytical skills with a good problem-solving attitude
- Ability to perform in a team environment
- Proficiency in HTML, CSS, Git

Time Commitment

15+ hours per week
